Embedding a Player in Blackboard

**Note:** We will use Panopto in this example. The process is the same for most players. This is for players inserted WITHOUT use of the Mashup tool in Blackboard.

Part 1: Find your Embed code.

1. Record your video as normal and wait until you receive your Panopto email
2. Look near the bottom, the last link is titled *Additional Output Formats*—Click this link
3. This takes you to our Panopto Website, log in with your username and Password (same as with the recorder)

4. You should see the Outputs page for your video, go to the second section—*Video Podcast*—scroll down to the *Embed* area.
5. Left-Click once in the area where you see the HTM code to highlight ALL the code. You can use the Ctrl+C keyboard command to Copy all the code.
6. Go to your Blackboard course and find the content area where you wish to post the player.
7. Click the Build Content button, select Item.
8. Click the HTML View button

9. In the resulting Pop-up window, use the CTRL + V keyboard command to Paste in the HTML code you got from Panopto.
10. Click the Update button
11. Click Submit in the Create Item screen.
Method 2: Embedding the Video

To Embed a video in Blackboard:

1. Record your video, get the email
2. Click on the link titled Additional Output Formats

3. Log into the Panopto @ Rappahannock web page
4. On the Outputs page, scroll to near the bottom, the section titled Embed.

5. Click in the box with the web code – it will highlight all of it
6. Right-Click and select Copy from the pop-up menu
7. Go to your class in Blackboard – to the content area where you wish to put the video
8. Click the Build Content button and select Item.
9. Give the new Item a Name, then go to the text editor
10. Click the HTML button at the bottom right of the icon bar
11. This will pop-up a new window. In that window Right–Click anywhere, click **Paste** from the pop-up menu
   Note: You May want to change the **HTTP** to **HTTPS** in the URL—see the Red circle below
